*Address: 123 Health St, City, Country*

*Contact: +123456789 | Email: info@xyzmedical.com*

**Patient Name: M. Abdullah**

**Patient Age: 22 years**

**Patient Gender: Male**

**Blood Group Detected: A- (A Negative)**

**Detected Components: A**

## **Test Methodology:**

The blood group detection was performed using YOLOv8 object detection model. The model analyzes the blood sample and identifies key markers associated with different blood groups.

**Conclusion:** Based on the analysis of the blood sample, the detected blood group is provided above.

For further analysis or additional tests, please consult with the attending physician.
